SERVICES

EMPLOYEE MANAGEMENT

Employees are the backbone of any company; their management plays a major role in deciding the success of the organization. With employee management system, there's no more need for paper trails or time-consuming manual processes.

Features:

- ✓ Eliminate paper trails and manual processes with complete online management of timesheets, expense reports, purchase orders and more.
- ✓ Eradicate errors and manual re-entry through seamless integration with payroll service.
- ✓ Simplify employee resource management with easy record management.
- ✓ Streamlined on-boarding.

ACCOUNT MANAGEMENT

Account Management System to meet all the financial & billing needs of the company. It's closely integrated with all other modules. This manages all the transactions of the company.

INVOICE GENERATION

Invoice Generation handles automatic invoice generation in real-time or at periodic intervals based on the operational information received from various operational systems. This module Provides Automatic interface to financial system.

Features:

- ✓ Multiple Currency and Company support.
- ✓ Import/Export data from/to excel
- ✓ Support for recurring billing handling
- ✓ Automatic invoice generation
- ✓ Automatic print or email of invoices and Ability to send Invoices via EDI
- ✓ Multiple Customer Invoice format capability
- ✓ Accrual Invoice generation
- ✓ Credit and Debit Note capability

REPORT GENERATION

The reporting generation module improves communications between the physical system and management. It provides a quick way to summarize and present information on all aspects of the user facility.

The report is then generated, displaying a soft copy on the operator screen. A hardcopy can be printed by the push of a button. Reports can also export to various formats: Excel, PDF, txt, etc...

It also provides the operator with the ability to create their own custom reports. The extensive amount of data that is collected regarding unit motion is what enables the reporting system to generate a variety of reports.

Any number of reports can be complied by referencing criteria, these include:

- ✓ Performance Report
- ✓ Location data
- ✓ Transaction
- ✓ Time moved

VEHICLE SERVICE MANAGEMENT

Vehicle Service Management handles all your fleet vehicles' servicing and mechanical repair requests. You can also book MOTs, windscreen repair and replacement, new tyres, batteries, exhausts, and hire a replacement vehicle.

Features:

- ✓ Text message reminder service on the day before service or repair due.

LOGISTICS MANAGEMENT

Great system availability and short reaction times are crucial for a successful logistics-system operation.

The logistics market is one of the fastest growing and changing markets, characterized by constantly increasing demands of the supply-chain participants. WAMAS needs to be continuously advanced and updated in order to remain a state-of-the-art product.

Ensure strong communication by sharing corporate policies, benefits, employee directories and more.
